Subject: request for site access at Redwood City salt ponds

Hi Roger,

Hope this finds you well and enjoying the New Year. Would it be possible for us to get access to the Redwood City salt ponds the last week of January? The purpose of the site visit would be to check ground terrain and water surface elevations. We haven't yet received the water quality data that we requested from Cargill, so we might also want to take some salinity measurements. We would like to complete the visit in one day, but depending on site conditions (e.g. road and levee conditions), might need an extra day or two. The group going to the site would be no more than three people. Please let me know if this can be arranged and if you need more information from me.

Thanks in advance for your assistance on this,
Sylvia
